PROFESSIONAL SUMMARY

Frontend / Angular Developer with hands-on experience building enterprise-grade web applications using Angular, TypeScript, and RxJS. Skilled in developing reusable, responsive UI components with Angular Material and Tailwind CSS, integrating REST APIs, and building complex reactive forms with dynamic validation. Experienced in enterprise data visualization using AG Grid and ECharts, and in improving application performance through lazy loading, code splitting, and Lighthouse-driven optimization. Comfortable collaborating with backend teams (Java, Spring Boot, MySQL) on end-to-end feature delivery, and using Git/GitLab for version control and release workflows.

TECHNICAL SKILLS

Frontend: Angular (Angular 10+, Angular 18/21), TypeScript, JavaScript, HTML5, CSS3, RxJS, Observables, Angular Standalone Components, Reactive Forms, Form Validation, Route Guards, Lazy Loading, Angular Material, Tailwind CSS, Responsive Web Design, Cross-Browser Compatibility, UI/UX Development

API & Integration: REST API Integration, HTTP Client, API handling

Data Visualization / UI Libraries: AG Grid, ECharts, Angular Material, Tailwind CSS, Figma

Performance Optimization: Lazy Loading, Code Splitting, Bundle Size Optimization, Lighthouse Performance Optimization, FCP/LCP Optimization, Production Performance Troubleshooting

Backend / Database Exposure: Java, Spring Boot, MySQL, REST API Development

Tools / DevOps: Git, GitHub, GitLab, npm, Angular CLI, Webpack

Additional: PDF.js, Cropper.js, OpenCV, TensorFlow.js, MediaPipe, AI-assisted development, workflow automation concepts

Soft Skills: Communication, Collaboration

PROFESSIONAL EXPERIENCE

Junior Software Developer (Frontend / Angular) | Convergent Platforms

June 2024 – Present

- Developed and maintained enterprise Angular applications, building reusable and responsive UI components using Angular Standalone Components, Angular Material, and Tailwind CSS.
- Integrated REST APIs across multiple modules, handling data binding, error handling, and state management with RxJS and Observables to support real-time enterprise workflows.
- Ensured responsive, cross-browser-compatible UI behavior across desktop and mobile breakpoints using Angular CLI-based build tooling.
- Built complex reactive forms with dynamic, multi-step validation logic to support business-critical data entry and workflow screens.
- Implemented route guards and authentication-related frontend flows to secure protected views and manage role-based access.
- Developed enterprise data tables using AG Grid to display and manage large, dynamic datasets with sorting, filtering, and export capabilities.
- Created interactive dashboards and data visualizations using ECharts to present transaction, sales, and analytics data to business users.
- Improved frontend performance by implementing lazy loading and code splitting, reducing initial bundle size and improving load times.
- Diagnosed and resolved production issues through systematic troubleshooting, collaborating with backend teams to close out API-related defects.
- Collaborated with backend teams to align on Java/Spring Boot REST API contracts and MySQL data structures, ensuring seamless frontend-backend integration.
- Followed Git/GitLab branching and release workflows, participating in code reviews and coordinating feature releases.

KEY PROJECTS

B2B Travel Booking Marketplace — Angular, TypeScript, RxJS, REST APIs

- Built responsive enterprise dashboard interfaces for a B2B travel booking platform covering air tickets, Dubai local attraction bookings, hotel packages, and travel insurance.
- Developed end-to-end booking workflows with REST API integrations for search, booking, and payment/reward/credit-related UI screens.
- Implemented reusable Angular components and Angular Material-based UI to standardize booking flows across multiple travel products.

Visa Application SaaS Platform — Angular, Reactive Forms, RxJS

- Developed an Angular-based enterprise UI for a visa application SaaS product, featuring complex multi-step forms with dynamic, conditional validations.
- Implemented workflow and route/view-mode logic to support different application states and user roles within the same module.
- Integrated REST APIs to handle application submission, status tracking, and document workflows, building reusable enterprise UI components throughout.

Dashboard & Analytics Module — Angular, ECharts, AG Grid

- Built transaction analytics and sales/profit dashboards using ECharts to visualize business performance data.
- Developed AG Grid-based data-table interfaces enabling users to filter, sort, and drill into large datasets.

Document & Image Processing Module — PDF.js, Cropper.js, OpenCV

- Implemented in-browser PDF handling and viewing functionality using PDF.js for document-heavy workflows.
- Built image cropping and passport/document image processing features using Cropper.js and OpenCV.
- Applied TensorFlow.js and MediaPipe for relevant image/document processing enhancements.

EDUCATION

Master of Business Administration (MBA) — Distance Education

2024 – 2026

Technology-Focused Course

3-Month Program

Bachelor of Commerce (B.Com)

2020 – 2023
